BALLOON BOOK

BALLOON BOOK 2021/2022

Everyone loves a good party

We know how to make it special! Our brand new Balloon Book is bursting with thousands of fantastic foil and latex balloons, all tailored to give your customers the best choice.

Foil Balloons from Anagram

With more than 60 years of experience, Anagram leads the world in making foil balloons with the commitment to first-to-market innovation. Anagram has the broadest product offering in the industry with innovative designs, a large portfolio of licenses and the widest array of balloon formats. From Orbz™, Anglez®, Cubez™, and Diamondz™ to more elaborate and special formats like Airwalkers® and the new AirLoonz™.

Latex Balloons from Everts

With almost 100 years of experience in producing, developing and selling latex balloons Everts offers a high level of expertise. Over 90 different colours, more than 60 formats and innovative print designs ensure a large and trendy balloon selection. Everts always aims for the highest quality standards, all latex balloons live up to the EN71 (toy safety) and EN71-12 (Nitrosamines and Nitrosatable Amins) testing.

All our new products are marked with the following, to make them easier to spot:

We hope this Balloon Book helps you find what you need and gives you a little extra inspiration. If you are ready to order or need any further information that you can't find here or on our website, please just give us a call.

about our films

Anagram's line of high-quality balloons with 20% Helium Savings per balloon!

Balloons made with Anagram's XtraLife® technology stay fuller and look fresher longer!

Anagram's XL™ Foil Balloons retain helium 3-5 times longer than non-XL™ foil balloons!

HOLO-GRAPHIC

Produces beautiful, eye-catching dazzle with twinkling patterns and color-enhancing effects!

SEE-THRU™

Anagram's clear, non-conductive film provides an exciting alternative to classic foil balloons.

Foil Inflation Guide

Helium makes balloons float. It's a non-toxic inert gas and is perfectly safe when used correctly.

- 1 Latex Nozzle
- 2 Tank Cylinder Valve (on/off)
- 3 Regulator Connector
- 4 Foil Nozzle

foil nozzle

Use to inflate all foil balloons except Orbz™ balloons.

latex nozzle

Use with caution!
Use to inflate Orbz™ balloons. Should NOT be used with foil balloons.

incorrect nozzle

DO NOT use with foil balloons!

Foil Inflation Guide

Insert the foil nozzle carefully into the valve opening.

Always hold the balloon straight when inflating. If the valve is bent, it might become damaged.

Inflate balloon slowly and let air fill smaller parts before inflating body completely. Otherwise, the body may overinflate and damage the balloon.

Orbz™ inflation

For proper Orbz™ inflation instructions using the Latex Nozzle, scan this code.

Inflated balloon should yield slightly when you push on them. If the balloon is not flexible anymore, it is overinflated.

Ribbon Attachment

It is your responsibility to make sure that helium-filled balloons do not escape and float away. Before inflating an Anagram balloon, you must attach a ribbon and weight (or attach a ribbon and secure it to a fixed object). This helps to ensure that the balloon can be retrieved if it is accidentally released.

Tie the balloon at the "Tie Ribbon Here" line using a regular knot or the method described below.

Do not tie the balloon above the "Tie Ribbon Here" line. This may damage the valve and helium will escape faster.

Tie a loop with your finger.

Fold the neck of the balloon once & place the loop over it.

Fold the neck of the balloon over the loop again and pull down firmly.

tape attachment

You can also tape the ribbon to the back of the tail, opposite the punch hole. Use a heavy-duty clear adhesive tape. Household adhesive tape may not securely adhere.

Weight Attachment

If you're not sure which weight to use, attach an 8-gram weight to the balloon and then inflate it. Let go of the balloon for a split second to see if the weight holds it down. If not, try a heavier weight designed for larger balloons or bouquets.

Balloon Category	Appropriate Weight
Standards, Junior Shapes	8 grams
Orbz™, UltraShapes™, SuperShapes™	25-50 grams
Jumbos	40-60 grams

A cluster of Spider-Man balloons. The central balloon is large and features Spider-Man in a dynamic pose. To its left and right are two smaller, rectangular balloons with a similar Spider-Man design. Above the central balloon is a red star-shaped balloon, and below it is a blue star-shaped balloon. All balloons are tied with white ribbons.

Crystal Clearz Petite

Anagram's Crystal Clearz™ are exactly that:
Clear, globe-shaped poly balloons available in clear and seven other colours.
Crystal Clearz™ Petites are pre-stretched with a self-sealing valve and are
easy to inflate to 10-12 inches across using a latex regulator.

About Latex Balloons

First ... a few notes about latex balloons

Latex balloons are made from 100 percent pure and natural latex. Latex is a substance harvested from the bark of a rubber tree, so you will sometimes hear it called “latex rubber.”

Because it is a natural substance, latex breaks down relatively quickly under normal environmental conditions. Latex balloons are completely photo- and biodegradable.

Inflating a Latex Balloon

Latex balloons are most often used as a complement to Anagram foil balloons in a decorator arrangement or a balloon bunch. Depending on how a latex balloon is to be used, it can be filled with either air or helium.

A properly inflated latex balloon is neither round nor pear shaped. A round balloon is considered under-inflated. One that is pear shaped (bulging out at the bottom) is considered over-inflated.

Over- or under-inflating a latex balloon will reduce its float time, so it is important to inflate your latex balloons properly, as shown below.

Here are a few other things that you should know about the proper inflation of latex balloons.

INCORRECT CORRECT INCORRECT

- Due to the difference in properties between air and helium, an air-filled latex balloon will last much longer than a helium-filled one. When filled with helium, an 11-inch latex balloon will usually float for 16 to 18 hours. However, filled with air the same size balloon will remain inflated for many weeks.

- Latex balloons to be inflated to less than 9 inches in diameter should be filled with air. If filled with helium, they will float for only a very short time.
- Temperature changes cause the helium inside a balloon to expand or contract. Latex balloons are designed to expand well beyond their listed size. This allows them to adjust to dramatic temperature changes as long as they are inflated to the correct size in the first place.
- Latex balloons float longer in cool conditions and shorter in warm conditions.
- The higher the altitude, the shorter the float time will be for a latex balloon.

About Latex Balloons

- Eventually, all latex balloons experience oxidation, which appears as a cloudy or dusty coating on latex balloons. Oxidation is caused by ultraviolet rays that attack the latex and begin to break it down. This process cannot realistically be prevented or stopped, but it can be delayed. A latex balloon in cool, dry conditions oxidizes more slowly than one in warm, bright and humid conditions. You should be sure to make your customers aware of this.

Tying a Latex Balloon

By tying a latex balloon, rather than using plastic discs or plugs, you will not only save time and money, but you will also achieve a better looking result. The following instructions will show you how to tie a latex balloon quickly, easily and efficiently:

Tying the balloon in this manner has several benefits:

1. Once you've perfected the technique, you'll find that it's faster than other methods.
2. Your balloons will look much more attractive without a plastic disk.
3. You'll reduce your costs by dispensing with disks.
4. You'll improve the float of your balloons by eliminating the weight of the disk.
5. You can pull the loose ribbon end to adjust the height of your balloons in an arrangement with ease. You don't have to remove them to shorten the ribbon.

NOTE!

Do not use this technique for balloons that will be taken outside. Wind can pull the balloon off of the ribbon.

If a balloon is to be taken outside, follow the instructions below, then tie the loose ribbon end around the neck of the balloon to secure it and attach the balloon to a weight so as not to have it fly away.

1. Cut a piece of ribbon to the desired length, plus a few additional inches for tying. Lay the ribbon across your left palm (or your right, if you're left-handed) as shown (figure 1).
2. Place the neck of an inflated balloon across the ribbon (the neck should be pointing upward). Place your thumb over both and hold securely in place (figure 2).
3. With your free hand, stretch the neck all the way around the index and middle fingers of your ribbon hand, ending in front (figure 3).
4. Tuck the neck of the balloon through the circle, along with the end of the ribbon. This will complete the knot. Remove your fingers from the knot and curl the ribbon tail (figure 4).

How many balloons will a bottle treat?

Balloon size	ULTRA HI-FLOAT 2,83 L (96 oz)	ULTRA HI-FLOAT 0,71 L (24 oz.)
11"	567	141
14"	283	70
16"	202	50

Float Times

Size of Latex Bal- loon	Helium Only	Helium and HI-FLOAT
9"/23 cm	½ day	½-1 week
11"/28 cm	1 day	1-4 weeks
16"/41 cm	1 ½ days	3-7 weeks
36"/90 cm	3-5 days	6-20 weeks

Watch our
instruction Videos
for more information
on using
Ultra Hi-Float !

<https://www.youtube.com/watch?v=Y1go1F13r7Y>

Hi-Float

HI-FLOAT can not only be used to lengthen the lifespan of latex balloons but also to create beautiful balloon bouquets.

Make sure to use the right restriction clip for your balloon size to control the amount of HI-FLOAT™ dispensed

If using the 2,83l bottle, make sure to place the plastic extension tube on the bottom of the pump

Slide the balloon on the pump outlet as far as it will go. Then press the pump down completely to add the correct amount of Hi-Float to the balloon

Pinch the balloon as you remove it from the nozzle to clean off the outside of the pump

Rub the balloon for a couple of seconds to spread the Hi-Float around

Make sure to point the helium latex outlet to the side or down when inflating Hi-Float treated balloons

DO NOT!

Inflating Hi-Float treated balloons with an upward facing helium latex outlet will result in Hi-Float running down and clogging the nozzle

Make sure to fully inflate the balloon with helium after treating it with HI-FLOAT. Under-inflated balloons will lean to one side.

HI-FLOAT needs to dry quickly inside the balloon to prevent helium loss. Use Hi-Float Balloon Transport Bags. They are ventilated and specifically designed for transporting and drying Hi-Float treated balloons

Electrical Balloon Inflator
Premium FoilPro
1 PKG/1

Premium FoilPro™ features and benefits...

- ✓ Uses Premium's 'Cool Aire® Technology' with our special low-speed motor to inflate with cooler air. No risk of damaging self-sealing valves and eliminates topping up when air cools down!
- ✓ Hands-free foot pedal inflates multi-compartment foils fast and easy.
- ✓ Flexible extension hose allows simple inflation of all valve compartments.

Balloon Tower

THE ALL-IN-ONE POS SOLUTION

Reliable earnings with minimal effort - emotional product presentation

Develop additional sales potential

Attractive earnings per unit high level of space productivity

Uniqueness and differentiation in the trade sector

No need of dedicated sales staff

Attractive pocket money price range

Immediately ready for sale (balloon + helium + weight)

ALL-ROUND CAREFREE PACKAGE FUNCTIONALITY - MADE IN GERMANY

SAFE

The helium bottle is locked and fixed safely within the display. Set up, training & support by our qualified staff.

EASY

Balloons can be filled easily with the automatic stop valve.

FLEXIBLE

Mobile product presentation is possible due to integrated wheels. Easy to handle & space-saving display solution.

INNOVATIVE

Balloons are fixed with a Clip-N-Spool weight to prevent them floating away.

Frequently Asked Questions

what are foil balloons really made of?

Anagram foil balloons are made of polyethylene terephthalate (PET) or nylon, both are man made materials. These materials are specially coated to give Anagram balloons their foil-like appearance.

what's the difference between latex balloons and foil balloons?

Latex balloons are made from liquid rubber, a natural substance that is harvested from rubber trees. Latex can cause allergic reactions in human beings. Anagram "foil" balloons are made from manmade materials (see previous FAQ for more information). They do not carry the risk of allergic reaction that latex does.

is it safe for a child to lick or eat the material an Anagram balloon is made from?

Anagram balloons are made from the same materials used to make packaging for food products such as potato chips. These materials are not harmful, and are safe for children to handle and use. However, as with any non-food product, ingesting the materials is not advisable. Anagram International strongly adheres to all safety standards in the manufacture of its products, and is dedicated to ensuring that they meet or exceed federal, state and municipal requirements. If a customer would like additional information on the proper use and care of our products, contact Anagram International at 1-800-262-6303. If a customer believes one of our products has been licked, sucked on or eaten by a child and has concerns, have them contact their local health provider, if necessary.

what should I inflate a balloon with?

Almost all Anagram balloons (except air-filled, consumer-inflated and decorator products) are intended to float. For this reason, they should be inflated with helium. This safe-to-use gas has unique properties that make it lighter than air and cause the balloon to float.

why did my balloon deflate after a storm?

This is not a defect in the balloon.

The apparent deflation is the effect of atmospheric changes on the helium inside of the balloon. These changes make the balloon appear "soft" after a drop in barometric pressure or temperature. If a balloon is inflated prior to a drop in barometric pressure, it will appear to have softened after the pressure change. In this case, simply re-inflate the balloon until it is firm again. Likewise, if a balloon is inflated indoors and then taken outside where it is colder, the balloon will appear to go soft. Once it is brought back indoors, the helium will warm up and re-expand, making the balloon look full again.

18- and 19-inch Balloons

The industry standard foil balloon which takes a variety of shapes, including circles, hearts, stars and squares.

AirWalkers®

Anagram helium balloon shapes with self-weighting attachments. Unique designs make the most of the way these balloons hover and seem to walk on air.

Balloon Bouquet

An arrangement of several balloons. A bouquet usually incorporates an odd number of balloons (5 or 7) and features a jumbo or helium shape balloon with coordinating 18-inch printed and solid balloons. The bouquet may be offered as a ready-to-go arrangement or as a packaged selection that is inflated in-store for the purchasing customer.

Balloon Corral

A corrugated cardboard floor display used to “pen” pre-inflated and weighted balloons. The corral is usually a temporary “in-and-out” promotional display.

Balloon Regulator

The device on a helium tank that monitors and adjusts the flow of helium into a balloon. In the United States, helium tank regulators are left-hand oriented.

Balloon Weight

An item specially designed to hold down a helium-filled balloon. Balloon weights come in many different shapes, colors, sizes and materials.

Coil Tail AirWalkers®

An Anagram specialty product line that features a helium balloon with a tail made of garland, shag coil, or film coil. The weight added by the tail allows the balloon to hover on its own. Coil Tail AirWalkers® can be circles, hearts, or stars.

Consumer-Inflated Balloons

Products that consumers inflate themselves using air instead of helium. These balloon types include: Anagram U-Inflate™ Shapes and U-Inflate Rally Flags™; Anagram EZ-Fill™ and EZ-Fill Eye-Poppers™; Star Centerpieces; Anagram Bottle Toppers™.

Decorator/Designer Balloons

A balloon line that includes both solid and patterned products in various shapes and film types. These balloons coordinate with latex balloons and are often used by florists or professional balloon designer/decorators for bouquets, banners, and other specialty creations.

Doo-Dads™

Anagram specialty balloons with embellishments such as maribou or stickers.

Drop-A-Line™ Balloons

Anagram specialty balloons with an attached string of graphic cutouts that serves as both decoration and balloon weight.

Eye Poppers™

Anagram balloon designs that incorporate adhesive bouncing eyes that are attached by the consumer.

Balloon Glossary

Holographic Balloons

Products made from clear or printed film that creates a light-reflecting, multi-faceted sparkling effect. Holographic films come in over 10 different styles, such as cracked ice and sparkles, which are two of the most popular patterns.

In-and-Out Display

See Balloon Corral.

Insider™ Balloons

Double-valved Anagram specialty designs that feature one inflated balloon inside of another. The outer balloon is made of a clear film to reveal the smaller balloon within.

Insider™ Dangler™ Balloons

Anagram specialty 3-D effect balloons that feature a clear outer balloon and a metallic foil shape hanging inside.

Jumbo Balloons

An extra-large balloon in one of many basic shapes, including circles, hearts, stars and squares. Jumbo balloons range in size from 32 to 36 inches (uninflated).

Lighted PanoramiC™ Balloons

Anagram specialty balloons that feature a clear front, printed back panel and multi-colored, strobing light stick inside that makes the product blink and glow.

Multi-Balloons

Designs that feature two or more shapes linked together. When inflated, they create a single extra-large balloon.

Non-Foil Balloons

Products made from clear, non-conductive film. These balloons are ideal for use in bouquets and displays in situations where electrically conductive foil balloons are not allowed.

Personalized Balloons

18-inch balloons that come with alphabet stickers. These designs allow the consumer to add a name or special message.

Planogram

A custom diagram for retail stores that illustrates how and where products should be displayed on fixtures.

Pre-Inflated Balloons

A small air-filled balloon on a stick that ships inflated and ready for sale. Designs include 9- and 4-inch circles, hearts, stars and squares, as well as 14-inch shapes.

Sing-A-Tune® Balloons

Anagram specialty balloons with built-in sound chips that play music, character voices and sound effects.

Solid Color Balloons

A foil or latex balloon printed in one color without any added graphic design.

SuperShape™ Balloons

Anagram specialty designs featuring large, intricate and unique shapes.

UltraShape™ Balloons

Anagram balloons made with three panels that give the balloon a true 3-D appearance.

Wire Rack

A type of fixture commonly used for permanent balloon displays. There are many types of wire racks, including various models for packaged and inflated balloons.

XtraLife® Technology

A proprietary Anagram manufacturing process that enables foil balloons to retain helium three to five times longer than standard foil balloons.
